SURVIVE - Surviving The Storm: Identifying & Linking Internal Capabilities with Business Continuity <http://surviving.eu/>

The three transnational project meetings realized

During the project development, the partnership has realized three transnational meetings (one in Potenza in Italy in December 2017, one in Krakow in Poland in March 2018 and one in Puerto de Sagunto in Spain in the beginning of this month). During the meetings, the partners planned the project steps and their respective roles, verified the activities already developed, established the JSTEs to be organized and discussed the accomplished activities of the first year.

A radio broadcast and various articles on newspapers

Thanks to the project coordinator contacts, GODESK SRL, the partners, during the project meeting and the JSTE in Italy, obtained the media attention: so different articles were published on various local Italian newspapers and a radio broadcast went on air on an important national network, Lavoradio, that has about 800.000 radio listeners and that can be heard at the following link:

The three training courses realized

During the project "SURVIVE", till now, were realized in the partners' countries (and exactly in Italy, Poland and Spain) 3 different Joint Staff Training Events to which participated staff members of the partners organizations. All the three activities were very useful to learn how companies have overcome the crisis and to make an exchange of good practices in this field among the partners. During the second JSTE, placed in Krakow and hosted by Euro-Idea, the project Facebook page overcame 400 likes, as you can see from the photo below.
